

Arizona Report of Public Agency Performance on School-Aged Placements

Indicator 5: School-Aged Placements

Percent of children with IEPs aged 6–21 who were:

- A. Removed from regular class less than 21% of the day
- B. Removed from regular class greater than 60% of the day
- C. Served in public or private separate schools, residential placement, home, or hospitals.

Measurement

ADE/ESS extracts the data from SAIS using the service codes entered for students with disabilities by the public education agency (PEA) for the December 1 federal child count.

Data are not reported for a PEA when:

- The PEA had fewer than 10 students with disabilities enrolled on December 1, 2006, or
- The PEA had fewer than 10 students with disabilities in a specific placement on December 1, 2006.

In these instances, the data are not reported to ensure confidentiality.

Explanation of Indicator

This indicator provides information about the extent to which PEAs include students with disabilities in the general education learning environment. PEAs are required to offer a continuum of service options to meet the unique needs of each student; however, they are also required to educate students in the general education classroom to the maximum extent appropriate for each student.

Measurement A refers to students who spend all (or almost all) of their day in a regular classroom and is generally considered to be the least restrictive environment. Measurement B refers to students who spend all (or almost all) of their day in a self-contained classroom on a regular school campus and is generally considered to be a moderately restrictive environment. Measurement C refers to students who spend all of their day in a facility that is isolated from a regular school campus. These placements are generally considered to be highly restrictive environments.

In most instances, the percentages will not total 100% as the placement category known as “resource” is not reported in these data.

All data are reported for the 2006–2007 school year.

State Target for SY 2006–2007:

- Measurement A: $\geq 50\%$
- Measurement B: $\leq 16.5\%$
- Measurement C: $\leq 2.5\%$

State Average for SY 2006–2007:

- Measurement A: 52.3%
- Measurement B: 16.2%
- Measurement C: 2.7%
